## ARTICLE VIII

### STORM WATER DRAINAGE FACILITY

Included within the Property known as Alpine Pointe Subdivision located on ditch is a twenty-foot (20') irrigation easement for the White Drain to be maintained by Settlers Irrigation District. If the easement area between the dram ditch and North boundary of easement (rear Lot lines of residences) is not maintained, then the Association shall maintain weeds and debris. On ditch is a landscape storm water drainage Lot which shall be used for a detention pond/drainage basin in the Alpine Pointe Subdivision in which shall be maintained as follows:

Section 1. "Heavy Maintenance of Drainage Facility" - "Heavy" maintenance consists of periodically inspecting the drainage facility to ensure it is functioning properly; cleaning out the facility piping and mucking out the facility when the sediment level exceeds the designed storage level. All other maintenance shall be referred to herein as "light" maintenance. Ada County Highway District (ACHD) has opted to perform this "heavy" maintenance and shall be allowed by the Owners and the Association to perform this maintenance work. In the event ACHD shall decide not to do such "heavy" maintenance, then the Association shall do so.

Section 2. "Light Maintenance of Drainage Facility" - The Association shall provide all "light" maintenance of the drainage facility as specified in the MANUAL FOR LIGHT MAINTENANCE. If the Association does not do the required "light" maintenance, ACHD shall have the right to do such maintenance and assess the costs back to the Association. This light maintenance shall include the following items:

The maintenance area shall include the entire Lot in which the drainage facility is located. For the various "light" maintenance items involved, periodic inspections are to be made of the drainage facility in addition to any work required in each of the categories below. These inspections shall be done a minimum of once every month.

(a) Weed Control. In the spring of each year, a herbicide shall be applied to the entire area of the infiltration pit lot. The application shall be in accordance with the manufacturer's requirements. During the periodic inspections, any weeds found shall be removed at the root and disposed of offsite.

(b) Lawn Care. Since the drainage facility is grassed, fertilizer shall be applied at a rate and interval to keep the grass healthy. Also weekly mowing and grass clipping removal shall be performed to maintain a healthy appearance and working drainage facility.

(c) Irrigation Water shall be applied to the grass at a rate that will keep the grass healthy and not interfere with the proper operation of the storm water drainage facility. Over irrigating must be avoided, as this will cause puddling and deterioration of the drainage facility performance.

(d) Storm Dram Manholes. During the periodic inspections, the inside of the storm drain manholes shall be checked for any accumulated debris or trash. Any debris or trash shall be removed and disposed offsite.

(e) Trash Cleanup. During the periodic inspections, any trash found within the boundary of the drainage facility Lot shall be collected and disposed of offsite.

(f) Bank Stability. During the periodic inspections, the banks of the drainage facility shall be checked for any water spots, water entering the drainage facility from adjacent Lots, rodent holes, and bank erosion. If any serious problems are found, the

Association shall contact a licensed earthwork contractor to make the necessary repairs to the drainage facility.

(g) Inspection and cleaning of pipes. After a rainstorm, the storm water pipes shall be inspected to ensure they drain the sediment traps. In the event that a pipe does not drain or flooding occurs in the street at the sediment trap locations, the Association shall have the pipes cleaned by a certified pipe inspection and plumbing service. In the event that a drainage pipe is broken or needs to be replaced, the Association shall contact a licensed underground pipe contractor to do the necessary construction.

**Section 3. “Operation and Maintenance Manual for Storm Drainage for Alpine Pointe Subdivision”** The neighborhood Association must follow the practices and procedures as outlined in the Operation and Maintenance Manual for Storm Drainage for Alpine Pointe Subdivision.

**Section 4. “Proposed Changes”** Any proposed changes to the drainage facility, or any other documents related to the storm water drainage system previously approved by the ACHD, requires concurrence by the ACHD prior to making such changes.

**Section 5. “Association Failure to Maintain: ACHD Remedies”:** In the event that ACHD determines, in its sole discretion, that the Association is not adequately maintaining the infiltration pits, then ACHD shall, before undertaking maintenance of said Common Area, provide written notice of its intention to begin maintenance within a thirty (30) day period, within which time frame the Association may undertake to initiate and conclude all maintenance defects as identified by ACHD. In the event that the Association shall fail to commence and conclude maintenance of the infiltration pits to the extent said items of specific maintenance are identified by ACHD within the prescribed thirty (30) days, then in that event, ACHD may begin to undertake such maintenance. ACHD is hereby granted an irrevocable license and easement to enter upon any portion of the Common Area to perform such inspection and maintenance of the infiltration pits.

Should ACHD engage in maintenance of the defined Common Area or facility after having provided notice to the Association and having provided the Association an opportunity to undertake said maintenance, ACHD shall first bill the Association and if such bill shall not be paid within sixty (60) days, then ACHD shall be entitled to and empowered to file a taxable lien against all Lots within the Subdivision with power of sale as to each and every Lot in order to secure payment of any and all Assessments levied against all Lots in this Subdivision pursuant to the Declaration as if said had been performed by the Association, together with interest at the rate which accrues on judgments thereon and all costs of collection which may be paid or incurred by ACHD.

The Association shall not be dissolved or relieved of its responsibility to maintain the defined Common Area and facilities contained therein without the prior written approval from ACHD. The Association and all Lot Owners, by accepting title to a Lot, agree that all Lot Owners within this Subdivision are benefited Property Owners of such maintenance.
